

# iSpring AI

Get ready for iSpring AI (Artificial intelligence), our new genius course creation assistant in iSpring Page and Cloud. iSpring AI can write and edit text, offer ideas for courses, write questions in quizzes, and also enhance the visual course design itself – highlight important fragments, create lists and select headings, etc.

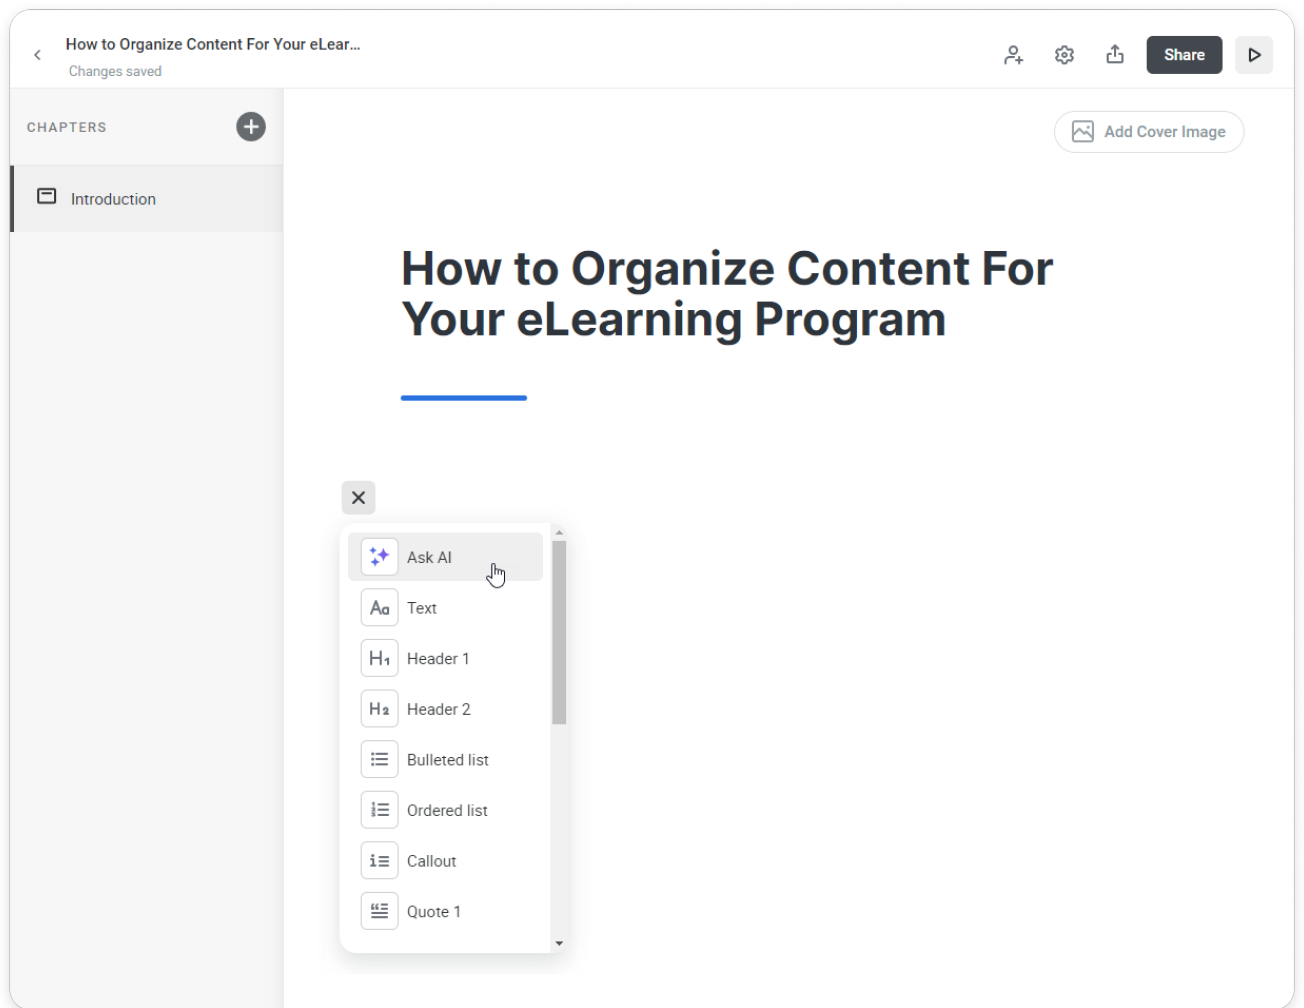

## How to Create Content With iSpring AI

There are three ways to get started with the AI assistant:

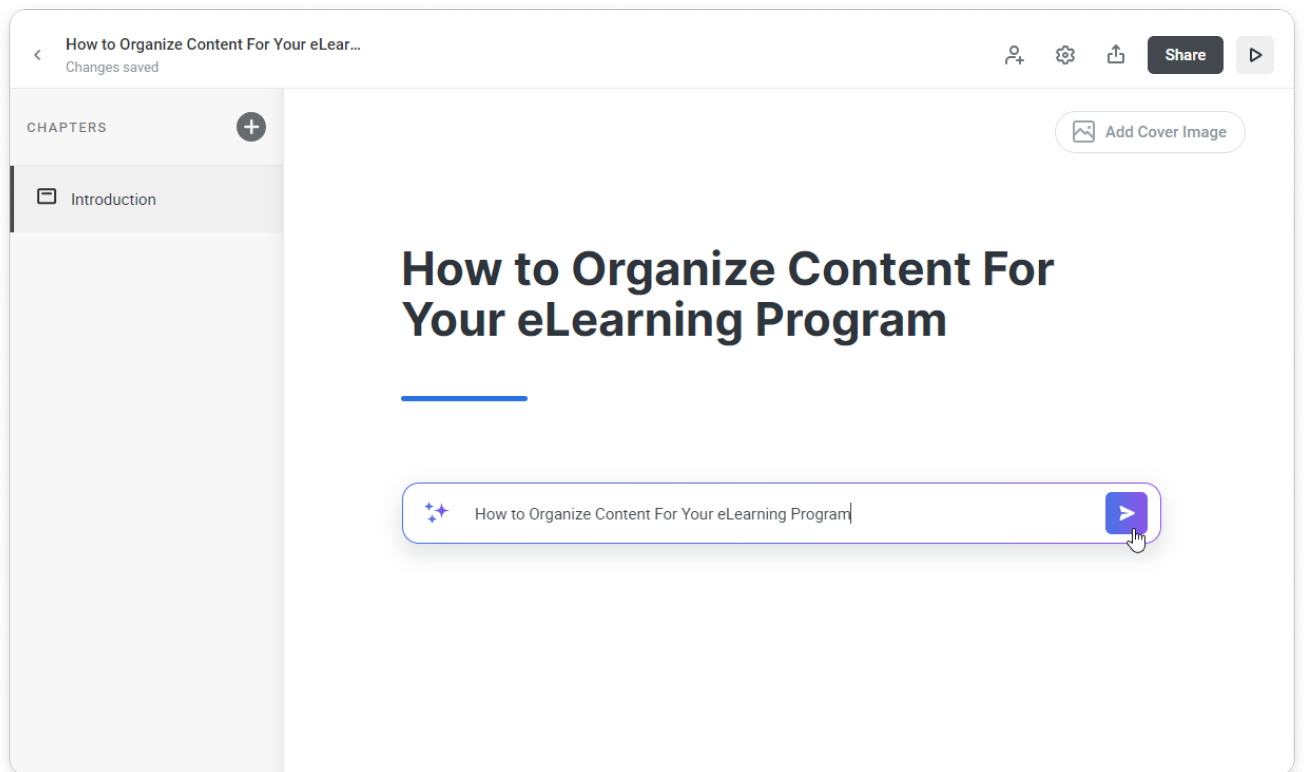

- Click “+” → **Ask AI**.
- Select text → **Ask AI**.
- Press the spacebar.

Let's look at the first way:

1. Click on “+” and select **Ask AI**.

2. Next, enter and submit your request.

3. The AI assistant will offer its suggestion. You can add text or ask for additional results by clicking on “Try again.”

incorporating a variety of multimedia elements such as videos, audio, images, and interactive activities. This will engage learners and enhance their understanding of the content.

9. Add supplementary resources: Provide additional resources such as readings, case studies, or links to external websites for further exploration. This will allow learners to delve deeper into the subject matter if they desire.

10. Review and update regularly: Regularly review and update your content to ensure its relevance and accuracy. Incorporate feedback from learners and make necessary improvements to enhance the learning experience.

By following these steps, you can effectively organize your eLearning content and create a structured and engaging learning program for your audience.

Structure the text and add lists or headings.

You can't copy previous requests or suggested texts. You can only paste the final result.

Done! Together with iSpring AI, you created a beautiful and informative longread.

## Steps to Organize Your eLearning Content

- 1 Determine the learning objectives
- 2 Divide content into modules or topics
- 3 Create an outline or storyboard
- 4 Chunk content into bite-sized pieces
- 5 Use a consistent structure and format

Ask iSpring AI to write or improve text...

Course authors can not use iSpring AI in trial versions of iSpring Page and Cloud, but they will learn about the new feature and will be able to purchase a subscription.
